# About us

Launched in September 2018, the economic news and financial analysis platform [www.financialintelligence.ro](http://www.financialintelligence.ro) stood out from the very beginning in the economic media landscape, but also on the market of business events, in sectors of strategic interest, such as energy, the capital market, banking or cybersecurity.

In a time when quality press has become a rarity, a team of journalism and communication professionals, with over 20 years of experience in economic press and organization of business events, laid the foundations of a brave project - a real support for business people and an important landmark for business development.

In the almost 5 years since its establishment, Financialintelligence.ro has experienced spectacular growth and recorded a traffic of approximately 14 million impressions, of which 3 million impressions were recorded in the last 12 months, and 6 million unique users, of which 1.4 million unique users accessed the site in the last 12 months.

We address business people - decision-makers, with higher education, high social status, incomes above average, both men and women: top and middle managers from various fields of activity, officials of state authorities, politicians, ambassadors, entrepreneurs, students and young people who want to enter the business environment.

51.7% of the Financial Intelligence audience is male and 48.3% is female. 23.86% of readers are between the ages of 25 and 34, 26.23% are between the ages of 35 and 44, and another 21.71% of them are people between the ages of 45-54.

We are independent from any political party, state institutions or other interest groups, political or commercial, domestic or foreign, secret services and campaign for progress, freedom, human rights and prosperity.
